

Statement of Egidija Medekšaitė artistic objectives during the residency

- Would like to start work on new piece, which is commission of electronic music festival “Jauna muzika” (2011). This festival will take place in May, in Vilnius, Lithuania. During this festival I would like to present 30 minutes long piece. This piece will be based on recordings of voices, sounds, which I will record during my staying in residency. This piece will be presented as Sound Gallery work.
- I will make workshops for children’s about “Contemporary music in Graphics scores”. This workshop will take 4 hours. I would like to present how composers using drawing realized their ideas, how they understand the sound looking at the circles, line and etc... and how this graphic score can be played as well... after short presentation I would like that every children would make graphic score for his instrument or his and later we will perform it in live session “Noise music”. Recently it is very popular still theme of electronic music artist, who are using a lot of different kind of noises in their works. So, during our performance every pupil will have possibility to realize his ideas, to explore his instrument.
