

It was a privilege to be here.

Surrounded by nature, silence and artists from different fields, I enjoyed the time in Krems very much.

Accommodation and staff members of AIR- Krems were great, engagement of Sabine Güldenfuß, Program Coordinator- remarkably helpful.

Atmosphere and environment are offering an ideal condition for reflection, introspection and experimentation free from the distractions and duties of daily life, provided an exclusive self-directed work time.

Those three months enabled me to experiment with new materials, explore the possibilities and application limitations of cardboard, make some models and start to develop a new project.

Seduced by wide, clear and specific light blue sky - I made a new series of photos "heaven Krems", which is an continuation of "heaven 180 degrees", series I developed in 2006.

Thank you for your generosity,
with best regards ANA Elizabet
