About the residency

The first think will come into my mind is SILENCE

A different sence of time. The time like the river is running and running but always feels slow an peaceful, which of course neither the river nor the time is always...peaceful.

When time runs slow gives the possibility to be taken by thouhgs memories and ideas... nobody will stop you here... so you can keep going and going. Deeper and deeper...

Sometimes the only thing that reminds you that times runs is the Danube.

What a beautiful view the river. The river sometimes dark as black, sometimes full of light. Impossible to look at him.

Studio 24, full of light everyday...

Back in Berlin I will miss this sense of time. The time of isolation and concetration.

Thank you Karin for being here for us, for visiting regularly our studios for the deep looking on the art works and all the creative conversation.

But also thank you for including us in the life of Krems. For getting knowing the city, the people and the surroundings.

Dear Sabine... thank you for you always being there to help me and not only where you suppose to help me!

Dear David, thank you for inviting me. For giving me this possibility.

And a big thank you for Frau Lammer for being so careful with my contemporary private space.

Auf Wiedersehen!
